

## **\*\* IHU Econ Students' Success Stories \*\***

«My studies at the International Hellenic University - Serres Campus began in 2018 at the Department of Accounting and Finance of the Technological Educational Institute of Central Macedonia. Upon completing my undergraduate program, I was admitted to the Master's program in Financial Management at the International Hellenic University, where the knowledge and guidance I received played a significant role in shaping my professional career.

My academic background was further strengthened through my participation in the BIP Erasmus+ programme, offered by the University's Department of Economic Sciences. This experience provided me with modern insights and practical exposure that helped me confidently pursue positions of responsibility in the job market.

During my undergraduate studies, I completed my internship at KRI KRI SA. After that, I joined the internal accounting department of ACA LIGHT, where I gained substantial experience in accounting operations.

Today, I am once again employed at KRI KRI SA, which trusted me and assigned me new responsibilities after my performance during my internship. I now work as an Assistant Accountant and Deputy Cashier in an environment that enhances my professional development on a daily basis.

Looking back, I recognize that dedication, continuous learning, and the utilization of my academic foundation have shaped a steady and upward career path. My studies at the Serres University Campus played a decisive role in forming my professional identity».
